Project Name	Credit Card Approval Prediction
Maximum Marks	2 Marks

Data Flow Diagram

This diagram shows the path applicant data takes through the Credit Card Approval Prediction System, tracing how it moves between outside actors, internal processes, and storage.

Symbol	Name	Description
Oval	External Entity	Represents the applicant or a bank staff member who interacts with the system.
Numbered Rectangle	Process	Converts incoming data into a meaningful result.
Solid Rectangle	Data Store	Holds applicant records and prediction results.
Arrow	Data Flow	Shows how information travels between entities and processes.

DFD - Credit Card Approval Prediction
