

Team Involvement in Demonstration

Date	02/07/2026
Team ID	
Project Name	Credit Card Approval Prediction
Maximum Marks	1 Mark

Team Involvement in Demonstration:

This document records the active participation and roles during the project demonstration. It ensures that all contributions are documented and responsibilities are clearly defined.

S.No	Team Member Name	Role in Demo	Participation
1	M.Manoj Kumar Reddy	Sole Developer & Presenter	Active

Contribution Summary:

Project Introduction & Objectives: Introduced the credit card approval prediction problem and system objectives.

Data Processing & Insights: Presented data preprocessing steps including label encoding, feature scaling, and handling missing values from the UCI dataset.

Model Training & Algorithm: Demonstrated the XGBoost classifier training process, achieving 90% accuracy and 0.9453 AUC score with cross-validation.

Backend API & Architecture: Explained the Flask REST API with /predict endpoint, safe_encode() fallback for unseen categories, and JSON response handling.

User Interface Walkthrough: Showcased the responsive HTML form with 12 input fields (age, income, debt, credit score, employment, citizenship, industry) and real-time prediction display.

Testing & Q&A: Performed end-to-end testing with sample data using Postman and browser validation; answered all technical questions.

Team Coordination Notes:

Aspect	Details
Sole Developer / Lead	M.Manoj Kumar Reddy
Project Scope	Full-stack ML: Data preprocessing → XGBoost training → Flask API → Web UI
Overall Rating (1-5)	5 (Solo, all objectives met)
Issues During Demo	None - all features tested and working
Key Achievements	90% model accuracy, functional REST API, user-friendly interface
