

Project Demo Planning

Date	02 July 2026
Team ID	
Project Name	Credit Card Approval Prediction
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the project is presented effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of the developer.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Introduce the credit card approval prediction problem and present the project objectives.	2	M.Manoj Kumar Reddy
2	Dataset & Data Preprocessing	Show dataset overview, explain missing value handling, encoding, and feature scaling.	3	M.Manoj Kumar Reddy
3	Machine Learning Model	Demonstrate XGBoost training, present evaluation metrics (90% accuracy, 0.9453 AUC).	3	M.Manoj Kumar Reddy
4	Flask REST API Backend	Explain the /predict endpoint and safe_encode() fallback for unseen categories.	2	M.Manoj Kumar Reddy
5	Web UI & Live Prediction	Showcase the form UI and perform live prediction with sample applicant data.	4	M.Manoj Kumar Reddy
6	Q&A; Session	Answer technical questions and discuss potential improvements.	2	M.Manoj Kumar Reddy

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Start with the business problem: banks need automated credit card approval decisions to reduce manual effort and improve consistency.
2	Solution Overview	Present the end-to-end architecture: data preprocessing, XGBoost model, Flask API, and web interface.
3	Live Feature Demonstration	Run through all demo sections in sequence with live predictions using sample applicant data.
4	Q&A; Session	Address audience questions on model selection, feature importance, and deployment.
